

AQUISEL, s.l.u.

Quality Policy

AQUISEL s.l.u. is a manufacturer of medical devices for In Vitro diagnostics. Belonging to the SELECTA group, through which it mainly carries out the distribution of its products, it bases its Quality Policy on the commitment of our organization in:

Identify the context of the organization and stakeholders, to establish the planning of their quality management system based on the requirements thereof.

Provide the necessary resources for maintenance, adaptation and continuous improvement of the Quality Management System established in accordance with the reference standards ISO EN 9001, ISO EN 13485 and FDA 21CFR820 in their subsequent revisions.

Guarantee that the manufactured articles comply with the legal regulations in force and the requirements specified for each product.

Comply with our clients requirements according to the previously defined and agreed specifications, either through the general catalog or through bilateral agreements.

Establish fluid communication channels with our main distributor JP Selecta, and in turn with their clients or potential clients.

Define the outsourced activities relevant to the proper development of our activities, and establish lasting ties in time.

Set and meet, periodically, quality objectives.

Communicate, inform, awareness and train both our staff, as well as those who participate in our activities, in all those aspects involved in the Quality Management System.

Introduce risk management in all processes of the Quality System scope as a preventive tool and improvement thereof.

Review this policy periodically, to establish if it is adequate for the purposes of the company.

Thus, I state in the present statement, as the main supporter of this policy, Abrera, April 10th 2019.

Raimon Perelló Colomer
(Director)
